

CLAIMS MANAGEMENT

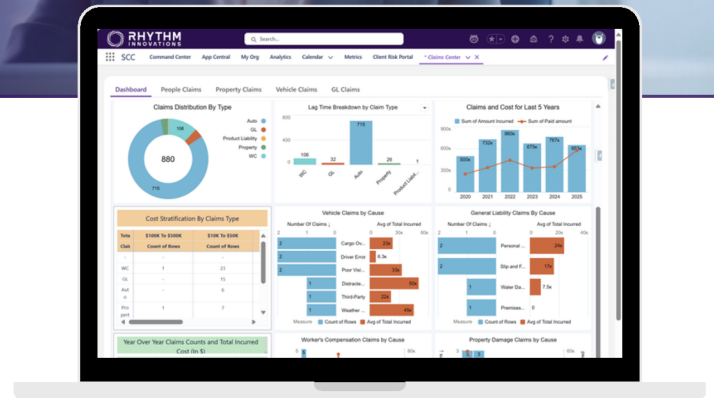

Actionable Claims Intelligence for Proactive Risk Mitigation

Rhythm transforms post-incident claims from a fragmented, manual process into a streamlined, structured, and efficient workflow—built for speed, clarity, and control.

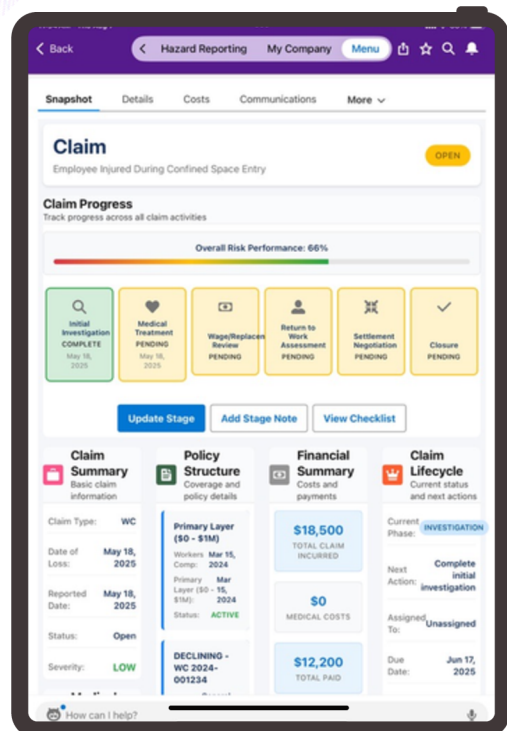

Modern safety and risk leaders are focused on clarity, traceability, and faster resolutions—not paperwork. Rhythm empowers teams with a connected, auditable, and automated claims management system that simplifies every step—from initial incident intake to final resolution.

Whether you're handling a single workplace injury or managing hundreds of open claims across sites, Rhythm gives your team the tools to improve cycle times, reduce claim costs, and stay regulatory-ready.

With Rhythm, teams gain full visibility into the claim's ecosystem—empowering EHS, Risk, and HR to make faster, smarter decisions. The result: fewer delays, improved compliance, and lower total cost of risk.

Claims Dashboard

Claim Snapshot

Streamlined Claims for Risk and Safety Teams

Rhythm helps companies streamline post-incident claims by unifying disconnected tasks into one efficient workflow. From incident reporting to claim initiation, it centralizes documentation and enables secure, timely communication with TPAs and carriers—reducing manual errors and delays.

Why Rhythm?

- ✓ **End-to-End Automation:** Streamlines the full post-incident claims lifecycle—from intake to resolution.
- ✓ **Seamless TPA Integration:** Connects effortlessly with third-party administrators and insurers for faster coordination.
- ✓ **Frontline-Friendly:** Empowers teams to submit, track, and manage claims on any device, in real time.
- ✓ **Connected Claims Intelligence:** Unifies claims with incidents, investigations, and medical records for full traceability.
- ✓ **Actionable Analytics:** Provides real-time insights into claim trends, resolution timelines, and cost drivers.

What Rhythm Delivers:

Integrated Incident-to-Claim Workflow

- Anchor claims to source incidents for full traceability.
- Eliminate duplication and streamline documentation.
- Submit FNOL from any device.
- Link multiple claims (WC, Auto, Property, GL) to one record.

TPA & Insurance Integration

- Sync claims data with external partners.
- Share docs, notes, and status updates.
- Eliminate back-and-forth emails with built-in communication workflows.
- Track payments and response times.
- Maintain full audit trail.

Claims Lifecycle Management

- Manage all claim types in one platform.
- Track policies, deductibles, and retentions.
- Monitor reserves, payments, reimbursements.
- View claims by person or organization.
- Spot repeat claimants and trends.

Government Reporting & Compliance

- Auto-generate government forms from incident data.
- Ensure timely submissions and reduce audit preparation time.

Medical & Case Coordination

- Monitor work restrictions and return-to-duty readiness.
- Log updates and provider notes.
- Coordinate across safety, HR, and claims.

Workflow Automation

- Auto-trigger claims from incidents or FNOL.
- Adjust forms based on claim type.
- Alert stakeholders at each stage.
- Auto-assign follow-ups with deadlines.
- Trigger notifications and reports.

Policy & Coverage Management

- Visualize layered policies by carrier/type.
- Track deductibles and retentions.
- Allocate costs by category and carrier share.
- Monitor renewal status.

Claims Analytics

- Frequency & Severity Metrics
- Incurred vs Paid
- Reserve Adequacy
- Subrogation Recovery Rate
- High-cost outline claims
- Total Cost of Risk (TCOR)
- Coverage level insights
- Incident reporting lag time

Cost & Recovery Insights

- Track incurred and paid costs by type (medical, wage, etc.).
- Centralize notes, files, and claim activities.
- Identify high-cost claims and repeat patterns.
- Calculate and reduce Total Cost of Risk (TCOR).

Use Cases by Role:

- ◆ **EHS Manager:** Uses Rhythm to manage post-incident claims, medical coordination, and OSHA reporting—reducing compliance risk and manual effort.
- ◆ **Risk Manager:** Leverages Rhythm to oversee all claim types and reduce Total Cost of Risk through centralized control and analytics.
- ◆ **Fleet Safety Manager:** Tracks and resolves vehicle-related claims faster with Rhythm—improving recovery and lowering fleet incident costs.
- ◆ **Executive Leader:** Gains real-time visibility into claims trends and risk exposure to drive smarter, enterprise-level decisions.
