RHYTHM INNOVATIONS

Fit2Drive™ MVR

Continuous Driver Readiness & MVR Monitoring

Know every driver is ready before they hit the road.

Fit to Drive™ MVR replaces periodic MVR reviews and manual spreadsheets with continuous monitoring, automated Driver Qualification File management, and real-time readiness verification so every driver is qualified, compliant, and ready to operate, every day.

Fit2Drive™ Benefits

- Improve driver safety
- Reduce administrative workload
- Improve audit readiness
- Improve driver accountability
- Support defensible safety decisions
- Strengthen FMCSA compliance
- Minimize manual recordkeeping
- Reduce insurance exposure
- Increase operational visibility
- Proactively manage driver risk

Fit2Drive™ MVR Key Capabilities

Continuous MVR Monitoring

Continuously monitors license status, violations, convictions, suspensions, revocations, and CDL endorsements as they change.

Driver Qualification File Management

Maintains digital, audit-ready Driver Qualification Files — document tracking, certificate management, and automated renewal reminders.

Driver Readiness Verification

Validates license status, qualification, and medical certification so every driver's eligibility is confirmed automatically before dispatch.

Invalid or suspended licenses are involved in **17.3%** of fatal crashes

77% Violation reduction after 12 months, monitoring and training combined

Annual MVR checks leave a 52-week blind spot between reviews

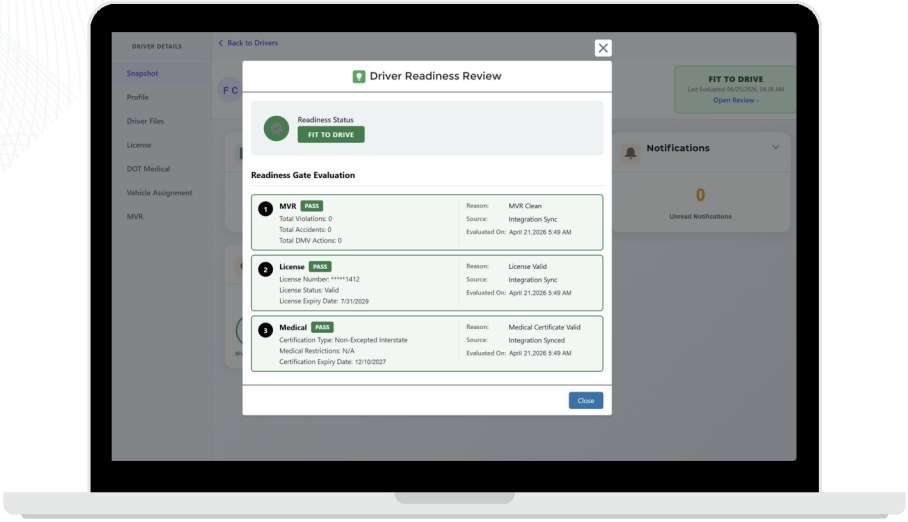
Dispatch Governance

Before a driver begins work, Fit2Drive™ MVR verifies that they are properly licensed, medically qualified, fully compliant, eligible to operate, and free of unresolved qualification issues, preventing non-qualified drivers from ever getting behind the wheel.

- Properly Licensed
- Medically Qualified
- Fully Compliant
- Eligible to Operate
- Issue-Free Qualification



Driver Readiness Engine

How Monitoring Works

Driver Consent Required

As the employer, you're responsible for obtaining driver consent before enrollment in this service.

Real-Time Alerts

You're notified as soon as new activity is reported by a DMV, medical card agency, or courthouse.

Always-Current MVR

The initial enrollment MVR and every triggered or annual update are reflected in SaferFleet automatically.

Ensure Every Driver Is Ready Before Every Trip

Schedule a demonstration and discover how Fit2Drive™ MVR can help you reduce risk, strengthen compliance, and keep every driver road-ready.

Why Rhythm?

Unlike standalone MVR monitoring providers, Rhythm integrates driver readiness into a broader operational safety ecosystem, connecting Fit2Drive™ MVR with telematics, fleet systems, training, compliance, HR, and operational workflows for a complete view of driver risk, not just MVR changes.
