

INCIDENT PREVENTION & INVESTIGATION

*Resolve with Precision.
Prevent with Intelligence.*

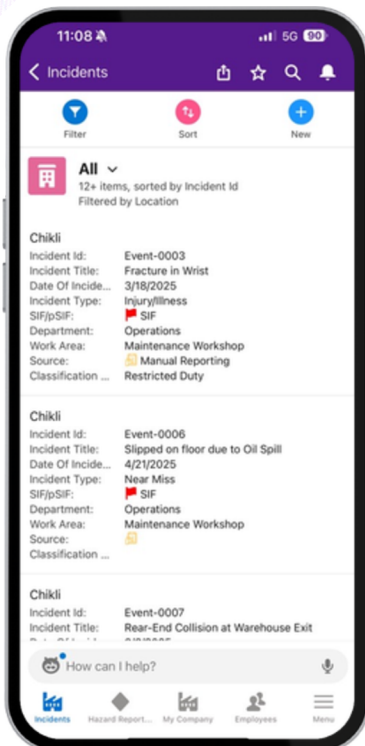

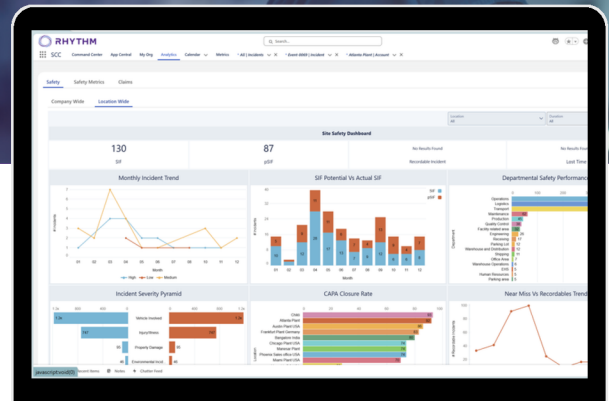

Transforming Event Data into Actionable Safety Intelligence

Organizations committed to operational excellence recognize that every incident - from near misses to serious injuries - is an opportunity to strengthen safety and improve performance. Achieving this requires more than reactive reporting - it demands a unified, enterprise-ready approach that turns events into insights and insights into action.

Rhythm Incident Prevention & Investigation provides a unified, mobile-enabled, and fully configurable platform to capture, investigate, analyze, and resolve workplace incidents. It supports every stage of the incident lifecycle—empowering teams to respond quickly, uncover root causes, and implement corrective actions that prevent recurrence.

Connected Insights. Safer Outcomes

Rhythm eliminates silos by unifying incident data into a single ecosystem, empowering safety, risk, and ops teams to act decisively and drive continuous improvement.

Incident List View

Digitize Every Report. Resolve Every Risk. Strengthen Every Site.

You can't be everywhere but with Rhythm, your incident data can be. Rhythm Incident Management gives EHS, operations, and safety teams the power to capture, investigate, resolve, and learn from every incident, near miss, and hazard in one connected platform, across every site, shift, and device.

From frontline reporting to root cause analysis and CAPA tracking, Rhythm streamlines the entire incident lifecycle while integrating with your existing systems for HR, telematics, claims, and compliance.

No more spreadsheets. No silos. No missed follow-ups.

Why Rhythm?

- ✓ **Fully Configurable:**
Aligns to your workflows, roles, and compliance needs.
- ✓ **Enterprise-Ready:**
Scales across departments, regions, and risk types.
- ✓ **Frontline-Friendly:**
Fast, intuitive, and available on any device.
- ✓ **Unified Ecosystem:**
Connects to HRIS, telematics, EHS, and claims platforms.
- ✓ **Built for Prevention:**
Transforms incidents into insights that drive safer operations.

What Rhythm Delivers:

First Report of Incident (FROI) & Near Miss Reporting

Capture all incident types, from injuries to near misses, on any device, with mobile-optimized, offline-capable forms and rich data inputs like attachments and geotags.

Investigations & Root Cause Analysis

Conduct structured investigations using configurable workflows and built-in RCA tools like 5 Whys and Fishbone diagrams to uncover systemic contributors.

Corrective & Preventive Action (CAPA) Management

Link root causes to CAPA tasks with full traceability, assign owners, set deadlines, and track closure with automated alerts and effectiveness reviews.

Claims & Case Management

Seamlessly connect incident data to insurance claims, legal cases, and HR follow-ups—ensuring context, continuity, and compliance in one record.

SIF/pSIF Classification & Risk Mapping

Automatically identify and tag high-risk events. Visualize exposure trends with heatmaps and track potential SIF events to drive proactive mitigation.

Regulatory Reporting Auto Generation

Generate regulatory forms with validated, pre-filled data to meet government requirements—streamlining reporting, audits, and compliance readiness.

Alert Bridge for Critical Event Communication

Trigger real-time alerts for serious incidents, pSIFs, or overdue CAPAs. Route notifications to the right stakeholders based on severity, location, or job role—with full lifecycle tracking and audit trails.

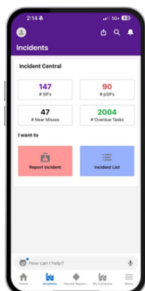

Real-Time Dashboards & Heatmaps

Visualize safety performance across your organization—by site, shift, asset, or role. Drill into trends, benchmark locations, and guide risk-focused decisions.

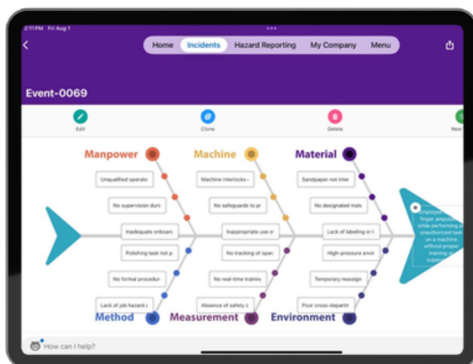

Insights & Pattern Analysis

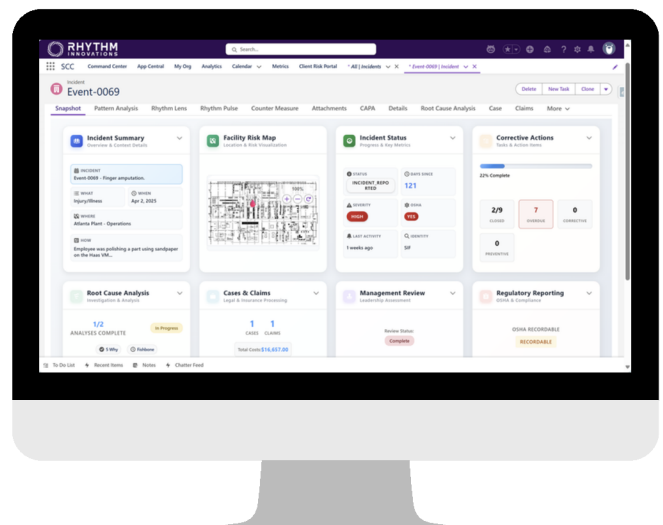

Turn incident data into actionable intelligence. Identify recurring causes, at-risk roles, and exposure clusters to strengthen control strategies and prevent recurrence.
